

CLAIMS PENDING

1. (Once amended) A device for emitting repellant odor or attractant scent comprising:

a closed container having an odoriferous composition therein, said composition comprising a carrier material and a liquid animal product mixed with said carrier material, said container being formed from a thin sheet material which is pervious to the passage therethrough of gas and impervious to the passage therethrough of liquid.
2. (Once Amended) The device of claim 1, wherein the thin sheet material is a fabric.
3. (Once Amended) The device of claim 1, wherein the thin sheet material is a woven fabric.
4. (Once Amended) The device of claim 1, wherein the thin sheet material is a plastic having a thickness within the range of one to five millimeters.
5. Once Amended) The device of claim 1, wherein the thin sheet material is latex.
6. (Once Amended) The device of claim 1, wherein the thin sheet material is perforated plastic.
7. (Once Amended) The device of claim 1, wherein the container is formed as a pouch having opposite flat sidewalls sealably joined at contiguous peripheral edges.
8. (Once Amended) The device of claim 1, wherein the thin sheet material is flexible.

9. (Once Amended) The device of claim 1, wherein said carrier material is granular.
10. (Once Amended) The device of claim 1, wherein said carrier material is a powder.
11. (Once Amended) The device of claim 1, wherein said carrier material is a fibrous material.
12. (Once Amended) The device of claim 1, wherein said carrier material is solid.
13. (Once Amended) The device of claim 1, said container having a rectilinear shape.
14. (Once Amended) The device of claim 1, said container having a circular shape.
15. (Once Amended) The device of claim 1, said container being contained within a sealed envelope.
16. (Once Amended) The device of claim 15, wherein the sealed envelope is formed from a plastic impervious to the passage therethrough of.
17. (Withdrawn)
18. (Once Amended) The device of claim 15, wherein said container is tightly fitted within the sealed envelope such that an outer surface of said container is in close proximity to an inner surface of the envelope.

19. (Once Amended) The device of claim 1, said container having a sidewall section that is impervious to the passage of gas therethrough.

20. (Canceled)

21. (Canceled)

22. (Canceled)

23. (Withdrawn)

24. The device of claim 1, said animal product being animal urine.

25. The device of claim 1, said animal product being an animal secretion.

26. The device according to claim 1, said carrier material being absorbent.
